#### **HOW IT WORKS**

Each module of our training programs represents a ONE - week intensive classes. If a week has a holiday, a missed class will be compensated in the same week. Each module starts almost every week

Unlike paying in full at the start of the programme, The 'Pay As You Learn' scheme , requires students to pay only whilst they are on the programme. Thus, if a student leaves the programme before completion, the payments will end and no more payments are required.

The weekly payment will be collected during the first week of each month, in advance of the week of learning. The first payment at the start of the programme will consist of two weeks worth of payments; comprising of the first week of the programme and the advance payment for the second week.
