PRACTICAL CISA TRAINING DURING COVID 19 PANDEMIC - MAY 2022 INTAKE

Course Description

With a growing demand for professionals possessing Information systems (IS) audit, control and security skills, CISA has become a preferred certification program by individuals and organizations around the world. This practical hands-on CISA training will enable participants to acquire marketable IS audit and security skills and pass CISA exam at their first attempts. *In response to the escalation of the COVID-19 pandemic, we now run this training program in two ways; Face-face and Virtual Learning using online collaborative tools to stream live trainers to all registered candidates during the scheduled classroom hours.*

In regard to face to face training, we have taken the following measures to mitigate the risks of COVID-19 .

- a) *Installed Sanitizing hand rub dispensers in our class rooms*
- b) *We encourage our students to stay at least one meter away from each other. Class rooms are designed to support this practice*
- c) *We provide face masks.*
- d) *We conduct friendly screening including body temperature check*

Course Contents

CISA candidates are taken through intensive training on the following five modules:

- Module 1— CISA's Role in the Process of Auditing Information Systems
- Module 2—CISA's Role in Governance and Management of IT
- Module 3 - CISA's Role in Information Systems Acquisition, Development and Implementation
- Module 4—CISA's Role in information systems operations and business resilience

- Module 5—CISA's Role in Protection of Information Assets

Training Methodology

We embrace holistic approach which is geared towards exploiting all the aspects for the candidates to pass CISA exam at their first attempts. In particular, this practical training program will be conducted in three Stages:

Stage I: Class room training : *At the beginning of each training module, participants will be assessed to measure their level of knowledge and skills. They will then be taught theoretical and practical aspects as per CISA curriculum. This will be done through face-to-face interactions with experienced certified facilitators. The training will be participatory and will include sharing of experiences, Case studies, handouts, group discussions, and Video shows. Comprehensive set of materials which include ISACA CISA review manual, Exam databases and supplementary materials to supplement the content areas in ISACA manual will also be provided. Participants will also get an opportunity to access real information systems and infrastructure components relating to specific topic under discussion. Moreover participants will be subjected to a series of mock exams to assess their progress and understanding of the key concepts being taught at the end of each module.*

Stage II: Real Information System(IS) Auditing : *Under the supervision of experienced certified IS auditors, the candidates will get an opportunity to conduct real IS audit assignment(s) in accordance with IS audit standards , guidelines and best practices. Participants will get access to the real business environment. Our ICT laboratory is equipped with among other things: a Network infrastructure with a Firewall, Intrusion Prevention System, , VPN technology, Biometric System, Cisco routers and Switches. The available business Applications include ERP system(Sage 300), Banking Software, PBX system, Academic Management System, and computer forensic software and tools*

Stage III: Mock Exam: Finally overall mock exam simulating a real CISA exam will be given to participants

Training Facilitators and facility :

- Our faculty members are practicing professionals representing prominent companies in Tanzania. They all possess specialist certifications in their areas of specialization including CISA, CISM, CISSP, CEH, CPA(T), and CIA . They also possess relevant academic qualifications such as PhDs, and MSCs and MBAs.
- They have over 15 years of experience in IS audit , Security Governance and Risk Management, Financial Accounting Audit.

Our rooms are fully furnished and accessible with touch interactive screens and wireless network. In addition, participants are able to wirelessly project

their laptops onto any of the large display screens within the training rooms to share their work.
