

RESONATE CONSULTING GROUP LTD

"We bridge the gaps"

CERTIFIED INFORMATION SYSTEMS AUDITOR (CISA)

Course Description

The rapid increase in **CISA** training demand for those who cannot attend our training sessions in Dar es Salaam necessitated the need for the introduction of training program for Participants outside Dar es Salaam to attend our CISA Training sessions in an easier manner. This hands-on CISA training will enable participants to acquire marketable Information Systems (IS) audit, security skills and pass CISA exam at their first attempts. As part of the training package, participants will get an opportunity to conduct real IS audit assignment(s) in a real business environment under the supervision of our experienced certified Information Systems auditors.

Course Contents

CISA candidates are taken through intensive training on the following five modules:

Domain 1—Information Systems Auditing Process

Domain 2— Governance and Management of IT

Domain 3—Information Systems Acquisition, Development, and Implementation

Domain 4—Information Systems Operations and Business Resilience

Domain 5—Protection of Information Assets

Training Methodology

We embrace holistic approach which is geared towards exploiting all the aspects for the candidates to pass CISA exam at their first attempts. In particular, this practical training program will be conducted in three phases.

Phase I: Class room training : *At the beginning of each training module, participants will be assessed to measure their level of knowledge and skills. They will then be taught theoretical and practical aspects as per CISA curriculum. This will be done through face-to-face interactions with experienced certified facilitators. The training will be participatory and will include sharing of experiences, Case studies, handouts, group discussions, and Video shows. Comprehensive set*

of materials which include ISACA CISA review manual, Exam databases and supplementary materials to supplement the content areas in ISACA manual will also be provided. Participants will also get an opportunity to access real information systems and infrastructure components relating to specific topic under discussion. Moreover participants will be subjected to a series of mock exams to assess their progress and understanding of the key concepts being taught at the end of each module.

Phase II: Mock Exam: Overall mock exam simulating a real CISA exam will be given to participants

Phase III Real Information System(IS) Auditing (optional): Under the supervision of experienced certified IS auditors and **at their convenience**, the candidates will get an opportunity to conduct real IS audit assignment(s) in accordance with IS audit standards , guidelines and best practices. Participants will get access to the real business environment in Dar es salaam . Our ICT laboratory in Dar es salaam is equipped among: a Network infrastructure with a Firewall, Intrusion Prevention System, , VPN technology, Biometric System, Cisco routers and Switches. The available business Applications include ERP system(Sage 300), Banking Software, PBX system, Academic Management System, and computer forensic software and tools.
